-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Specification

2. The abstract of the disclosure is objected to because it is a run-on sentence. Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hirakata et al (U.S. Publication 20020067332) in view in view Daiku. Hirakata et al (U.S. Publication 20020067332), particularly figure 13a and 13b, Powell (U.S. Patent No. 5,483,254) discloses the claimed invention except for the double-sided prism sheet. Hirakata et al (U.S. Publication 20020067332) particularly figures 13a and 13b discloses a light guiding plate 80 having opposed light input ends and a light emitting face

transverse to the light input ends; respective light sources 81 respectively disposed at a light emitting ends of said light guiding plate; a light control sheet 80a is disposed on a light emitting face side of said light guiding plate. Daiku (figure 12) discloses a light guiding plate 3 having opposed light input ends and a light emitting face transverse to the light input ends and light control and double-sided prism sheet with triangular prisms 6 on one side and cylindrical surfaces 7 on the other. It would have been obvious to one skilled in the art at the time the invention was made to modify the lighting device of Hirakata et al to include the double-sided prism of Daiku in order to efficiently control the light output of the display system of Hirakata et al.
